

FACILITY & FLEET ELECTRIC INFRASTRUCTURE FINANCING

Toyota Industries Commercial Finance (TICF) introduces financing solutions to accommodate your facility and fleet electrification business planning. As you begin converting and adding electric vehicles (EV) in your fleet, TICF is positioned to support those initiatives by providing special financing that will allow your business to maximize cash flow and acquisitions to meet your needs.

We would like to highlight the benefits and cost savings TICF has to offer:

ENERGIZED FINANCE SOLUTIONS

for better use of your cash flow and expense planning.

Balloon Options: To create cost savings we can offer flexible installment structures to match the project or cash flow needs with either Flex, graduated terms or with balloon options to give you effective lower payments.

Construction: We can provide interim financing, used to build out your electrification project, followed by conversion or refinance into a permanent loan.

Installment Opportunities: We can match terms to make better use of your cash flow by structuring payments that have workload savings for your accounting teams, business streams or business cycles. Monthly, bi-monthly, quarterly, annual payments in advance, or even a skip/seasonal option based on your business needs.

Payments: We can structure these longer-term projects with a customized payment approach and schedule to limit your initial expense.

Additionally, we can provide a quote opportunity: For a quote, please discuss your project details with your RSM to determine the best options and estimates available based on your credit and financial needs.

ELECTRIC INFRASTRUCTURE PROJECT FINANCE ESTIMATE*

AMOUNT	TERM	MONTHLY PAYMENT
--------	------	-----------------

PLEASE REACH OUT TO YOUR
TICF RSM TO DEVELOP A CUSTOMIZED
SOLUTION BASED ON YOUR
SPECIFIC PROJECT AND NEEDS.

**For a formal approval, we will need a current W-9 and other financial information, including a balance sheet and income statement, dependent upon the size of the transaction. With these types of projects, there is the possibility of a required down payment.*

We appreciate the opportunity you have given us to quote your electrification financing needs. Please let us know if there are any additional questions you may have.

BE AHEAD OF THE CURVE WITH ENERGIZED FINANCING

Converting to an electric facility and fleet opens new opportunities to maximize your profitability, become more sustainable, and help your business succeed.

We strive to help you by customizing and streamlining your electrification financing needs. **We are committed to the ease of doing business with you** by finding creative solutions for your facility that is both cost-effective and maximizes operational productivity. TICF can support your electrification project costs from beginning to end.

ELECTRIFY YOUR FACILITY

In addition to flooring electric Hinos and other EVs, your dealership facility or your customer's facility will need the installation of additional panels and charging stations. We provide the financing for you and your customer's facility.

FACILITY ELECTRIFICATION

360° End-to-End Project Financing Available

- ▲ Necessary facility-wide electrical upgrades
- ▲ Construction or Facility Expansion needs including cable and installation of charging stations
- ▲ New/Used Electric Truck Fleet

BATTERY CHARGING AREA

Depending on the size your fleet and type of electrification, there are several charging methods to consider. Your licensed contractor will survey, engineer, and provide the correct input voltage for your exact number of chargers.

CUSTOMER FINANCING OPTIONS

- ▲ Retail or TRAC financing your customer's purchases
- ▲ Custom project financing for your electrification needs
